2 (spring)	April – June	13 weeks
3 (summer)	July – September	12 weeks
4 (autumn)	October - December	13 weeks

Start Dates

The Pathways curriculum is designed in a way that allows students to enter the program on a weekly basis. We accept students at all English levels.

Level	Student Starting Level	Approximate Length of time
Pre-Pathway (integrated with regular ESL classes)	1-3	1-2 terms (30 lessons)
Pathway I	4-6	1 term (30 lessons)
Pathway II	6-8	1 term (30 lessons)

Structure

In the Pre-Pathways levels, students are integrated into regular ESL classes where they will learn and practice the foundations of English. Focus will be placed on the development of skills in grammar, vocabulary, reading, writing, listening, and speaking.

In Pathway I, students will build on the foundations of English skills, and shift more towards developing the skills which are essential for university bound students.

In the final level – Pathway II students will shift towards English for Academic Purposes. They will work on refining the skills that they learned in the earlier levels; however, the focus will move to those skills that will be necessary for life as a university student. In Pathway II, students will attend workshops that focus on note-taking techniques, summarizing lectures and building and developing research and presentation techniques.

VISA CHANGES FOR CANADA

Update to the study permit instructions related to prerequisite programs

Officers will issue a study permit for the duration of the first program of study if the program is a prerequisite (e.g., successful completion of an English as a second language [ESL] or French as a second language [FSL] program before starting another program of study).

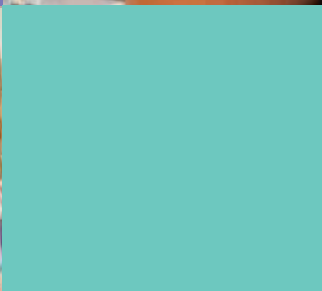

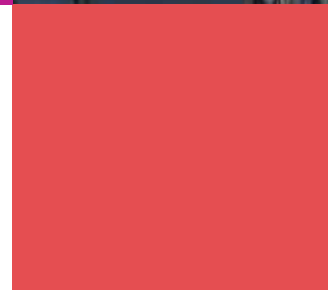

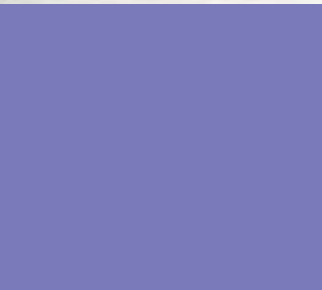

Currently, the general practice when processing study permit applications with a conditional letter of acceptance from a designated learning institution (DLI) stating that the completion of a first prerequisite program (such as ESL or FSL) is a requirement to enrolling in a subsequent program is to issue the study permit for the entire duration of both programs plus 90 days and to list the second DLI as the institution on the study permit.

A concern that has been raised by officers is that the student may not successfully complete their prerequisite program but will continue to hold a valid study permit allowing them to work. The issuance of a long-term study permit for two separate programs is having an impact on compliance reporting, as the study permits are being issued with the name of the second DLI and the DLI is receiving the reporting requests for those students even though the acceptance is conditional on the successful completion of their first program of study. Issuing a study permit or SX-1 visa for the first prerequisite program only will ensure compliance reporting is sent to the appropriate DLI, and students will not be negatively affected. Once the prerequisite program has been completed, the student can apply for a new study permit and demonstrate that the requirements of the first program have been met.
